

To New Smalltalk User:

Smalltalk is in an experimental state. It's currently being changed significantly for implementation in NoteTakers, Altos and Dorados. We are writing a book about Smalltalk; our aim is to be done by January 1981.

Use Smalltalk now but...be aware of pending changes, lack of support for fixing the current system, inconsistencies & redundancies in the experimental versions, and lack of completed documentation.

We request your tolerance and patience. We release this system and its documentation only upon request, to us. Please do not further distribute the system or the documentation. Other Xerox people who would like to use the system should contact us directly. Message Adele Goldberg <Adele.PA>.
