This is a test document for aligning landscape printers

When things are adjusted properly:

- Each of the cross-bars should be exactly five (5) inches long.
- Each of the cross-bars should be in the middle of the page

Fold the paper in half each way to check position.

Set-up procedure:

- First set length of the bars.
- Then set placement of the bars.

Log each setting on this sheet as you print it.
When you get it right, tape the final test sheet
inside the right hand lid of the printer.
