	Draw			Draw a line from the	<i>source</i> mark to the <i>dest</i> mark.			
	Alpha+Dra	aw		Move <i>dest</i> mark to lindraw from <i>source</i> to <i>a</i>	the up with <i>source</i> in either x or y, <i>dest</i> .	, then		
	Beta+Drav	v		Delete current selection	ons.			
	Alpha+Bet	ta+Draw		Undelete recent deleti	ion (to a depth of 4).			
	Move			Move current selectio	ons from <i>source</i> to <i>dest</i> .			
	Alpha+Mo	ve		Move origin mark to	current value of <i>source</i> .			
	Beta+Mov	e			orner, scale so <i>lower</i> remains on s res both <i>upper</i> and <i>lower</i> from th			
	Alpha+Bet	ta+Move		Zoom back with [0,0]	in to corner, scale as per ^M con	mmand.		
	Draw+Mov	/e		Copy current selection	n from <i>source</i> to <i>dest</i> .			

Alpha+Beta+Move+Draw

No operation (to change your mind).

Keyboard Commands

^B	Blowup	[14]	Shrink line widths in press file for subsequent blowup of picture.		
^D	Dashes	2, 4, 6, S	Draw Solid lines or dashes with ratio of black/white of 2, 4, or 6.		
^F	Font S or L		Set current font to small (Helvetica 8) or large (Helvetica14).		
^G	Grain [04]		Set fine grain to $1/(2^{**n})$ inches.		
<u>^ </u>	Input	filename	Read a picture from the named file.		
^K	Kill		Resets the current picture to empty.		
^L	LabelMode P or L		Insert labels in Portrait or Landscape mode.		
^0	Output filename		Write current picture to the named file.		
^M	Min-mag	[04]	Set minimum number of screen dots per inch to $(2^{**}n)$.		
^P	Press	filename	Make a press file of the current picture. If <i>upper</i> or <i>lower</i> are in the picture, they limit the region printed, and <i>lower</i> is adjusted (if necessary) to restrict the picture to 8"x10". If readjustment of <i>lower</i> is not necessary, this command removes both <i>upper</i> and <i>lower</i> from the picture.		
^Q	Quit		Return to the exec.		
^R	Redraw Selections		Redraw selected lines with the current width and dashedness; redraw selected labels in the current font.		
^S	Scale	[216]	Output scale in 1/16ths of inch per foot.		
^ T	Ticks		Turn on (off) ticks at 24 screen dot invervals.		
^W	Width	[14]	Set width for drawing lines.		
DEL			Cancel command		
LF			Repaint picture.		
text			Start a label, on CR insert into picture at <i>source</i> .
